About Me

I am a second-year B.Tech IT student at Rajkiya engineering college banda, with a strong interest in Data Structures & Algorithms(DSA), and Web Development. Currently learning DSA and web development, with the goal of becoming a full-stack developer.

I enjoy solving problems and taking on challenging tasks that help me grow.

I am eager to learn new technologies, build practical projects, and grow my skills for a career in software development. My aim is to build innovative and impactful solutions that address real human problems, contribute to society, and create meaningful change through technology and continuous learning.
